

Enterprise-grade cyber defence

BlackDice offers a comprehensive suite of cybersecurity solutions designed to protect and manage digital ecosystems across various networks. Each product is tailored to deliver robust security measures, leveraging Artificial Intelligence (AI) and Machine Learning (ML).

Product portfolio

Product

Function

Key Features

BlackDice Angel

Management of mobile devices when away from the home network

Ensures continuous protection of mobile devices under varying network conditions, ensuring security protocols remain active and effective regardless of location

BlackDice Equation

Central orchestration of data processing and storage

Manages user accounts, connectivity rules, and provides comprehensive threat notification and reporting

BlackDice Fortress

Comprehensive protection for devices connected to the home network

Offers a shield against digital threats within the home network, ensuring all connected devices are safeguarded

BlackDice Quantum

AI and ML platform offering insights into the cybersecurity landscape

Analyses vast amounts of data to predict and prevent potential threats, continually learning and adapting to the evolving digital threat

BlackDice Retina

Operator console for network-wide threat monitoring

Provides a centralised view of threat activities across all routers and devices, enabling operators to respond quickly to any anomalies or threats

BlackDice Reveal

API and SDK for accessing Quantum's functionalities

Allows operators and developers to integrate and leverage Quantum's capabilities within their systems, offering flexibility and customisation

 **SECURITY**

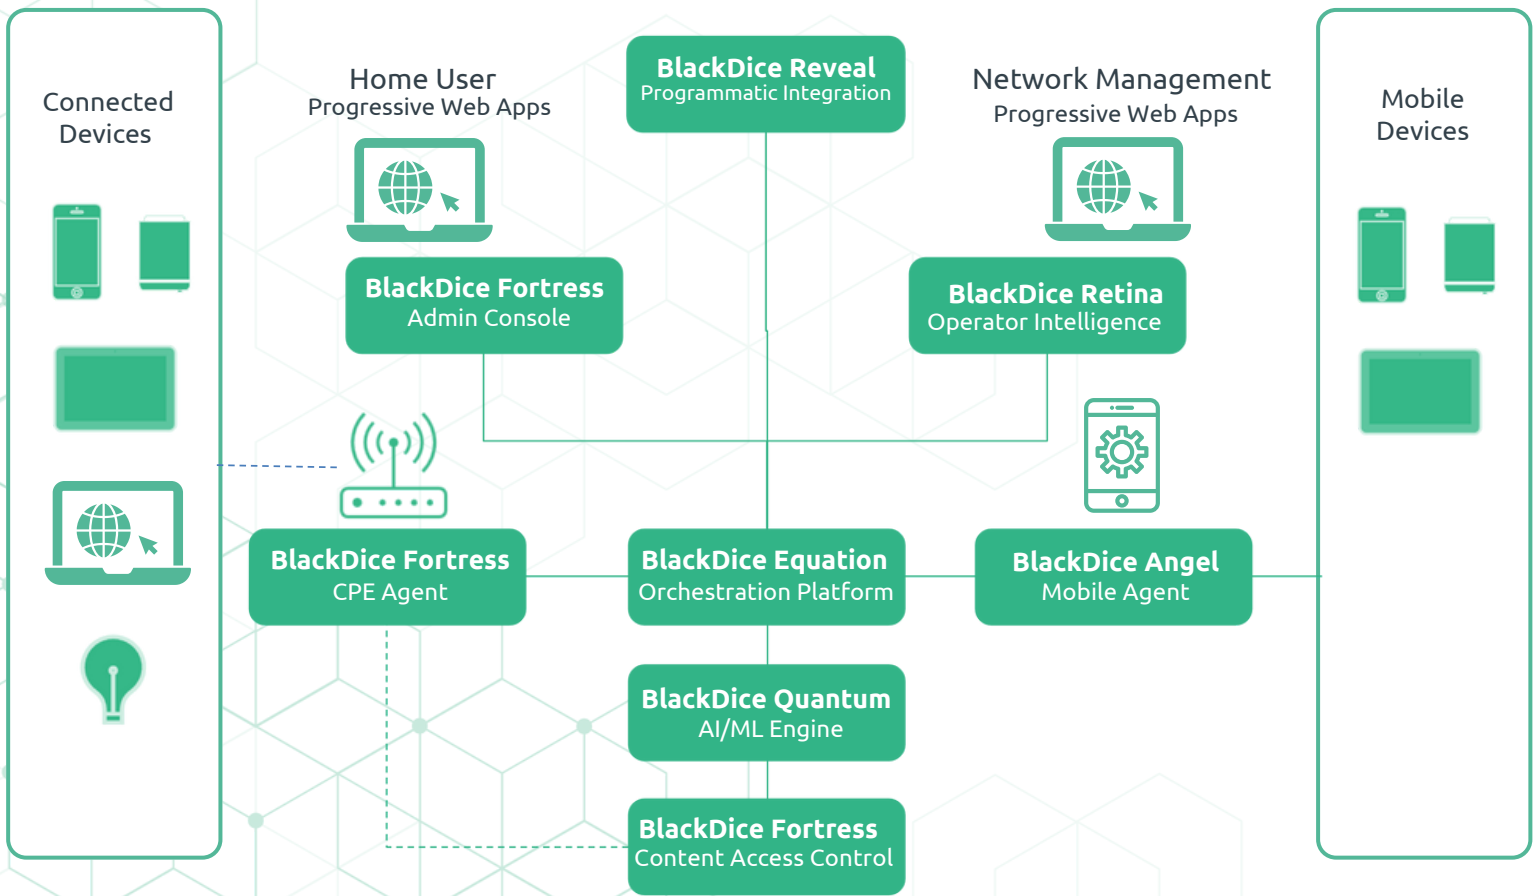

Ironclad encryption and proactive threat monitoring for uncompromised data security.

 **SCALABILITY**

Future-ready scalability, evolving seamlessly with your expanding network ecosystem.

 **SMARTER DEFENCE**

AI-powered insights for anticipatory threat prevention and network resilience.

Comprehensive protection on any device, across any network, at any time.

BlackDice's product portfolio and solution architecture represents a holistic approach to cybersecurity, combining advanced technologies with user-friendly interfaces. Our suite is designed to meet the dynamic needs of today's digital landscape, offering scalable and comprehensive solutions for a variety of users.
